Look, this is
RiggerTony!

He is a cheerful, strong, and adventurous event technology apprentice at Global Truss – a family business and one of the market leaders for truss systems in the event industry. But what does an event technician actually do? Together with his team, RiggerTony sets up gigantic stages, checks lighting fixtures, mixes sound for music and theater performances, and ensures that every event is safe and unforgettable. Did you know that there's probably someone you know who makes sure that every show becomes an unforgettable experience? Maybe he or she even gave you this booklet. Without these professionals, there would be no spectacular concerts, theater performances, or colorful light shows. They often travel from place to place to make great events happen all over the world. Isn't that exciting? They give us and so many others wonderful moments that we'll remember for a long time to come!

And if these important people are out working in the evenings or on weekends, don't be sad! Instead, they'll have extra time for you on other days – when many others are working, perhaps you can go on great trips together or do exciting things. Isn't that fantastic? This way, you share moments not everyone can experience!

Here you see RiggerTony, excitedly standing on top of his stage! Grab your most colorful pencils and color him along with the beautiful stage backdrop. Let your imagination run wild and create the picture just as you like it!

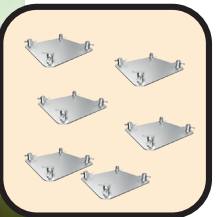

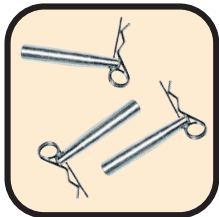

TRUSS ACADEMY

RiggerTony is always curious and eager to learn! If he hasn't worked on a stage for a while, he visits the Truss Academy. There he learns about new regulations and refreshes his existing knowledge. That way, he's always up to date and ensures that every show is a complete success!

Counting objects and matching them with the right numbers.

RiggerTony has already sorted some of the equipment he needs. Can you help him count everything correctly? Connect the number of items to the matching digits. That way, RiggerTony always keeps track and knows exactly what else he needs for his next event.

RiggerTony is often on tour all over the world.
Match the right dishes to the corresponding country flags.

Oliven & Schafskäse

Pizza & Vino

Croissant & Käse

Brezel & Bier

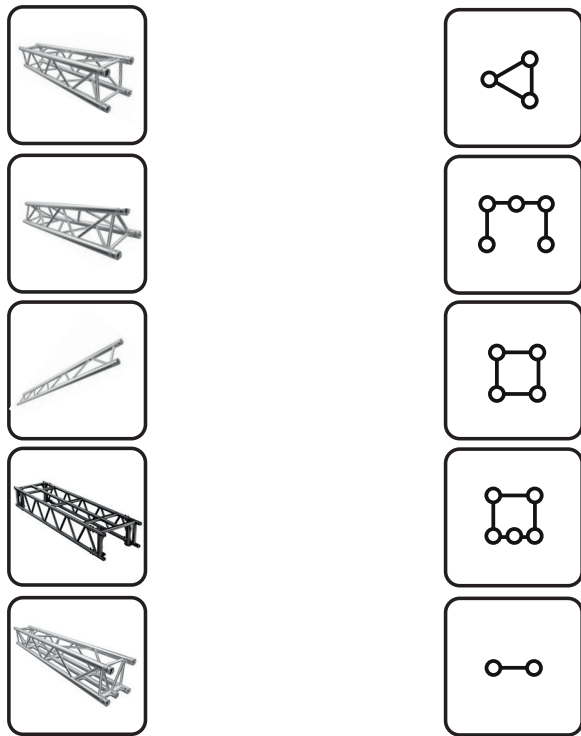

Burger & Pommes

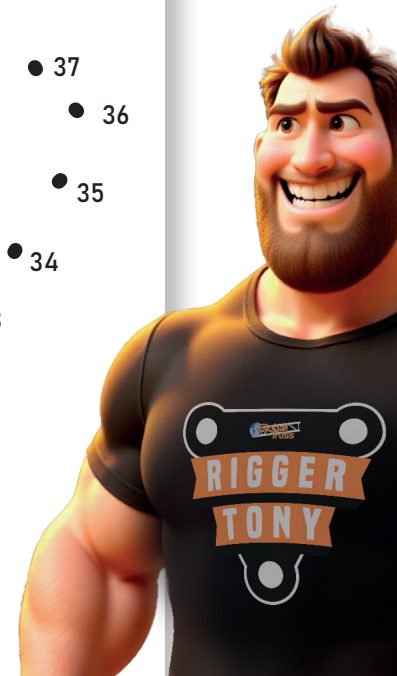

Whether in Italy, Greece, or America: RiggerTony travels from one country to another to help out at various events. Every country has its typical dishes. Match each dish with the correct flag. Then you'll know exactly which tasty treats RiggerTony can enjoy on his journey!

What fits here: Which truss looks from the front like the drawing? Connect the solution.

RiggerTony carefully inspects his truss systems. On one side you see what the truss looks like from the front. Take a look at the different trusses: Which one is the right match? Connect it with a line!

Connect the numbers in the correct order and see what it reveals.

Here you'll find a number puzzle! If you connect the dots in the correct sequence from 1 up to the highest number, a surprise image will appear. Are you curious about what RiggerTony has prepared? Let's go – connect all the dots and uncover the secret!*

Solution:
This is a so-called coupler. It is used to securely attach spotlights to trusses.

RIGGERTONY'S NUMBER PUZZLE

SUDOKU

RiggerTony loves tinkering with tricky puzzles and is a huge Sudoku fan! Each box must contain a number from 1 to 9, but each number may only appear once in each row, column, and small square. Can you help RiggerTony fill in the Sudoku correctly? Have fun puzzling!

Find the right path
to the stage.

Stage

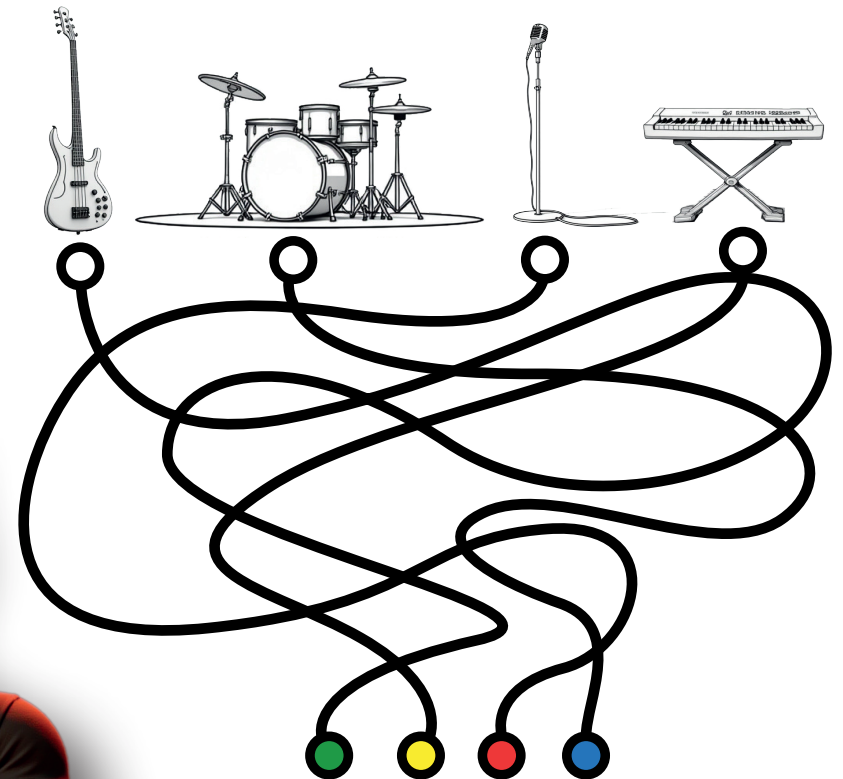

Start

The stage is already waiting for RiggerTony! But the path there is quite a maze. Can you find the correct route so RiggerTony arrives safely and can set up the equipment? Take a pencil and trace the path through the maze. Good luck!

Cable chaos:
What a tangled mess of cables!

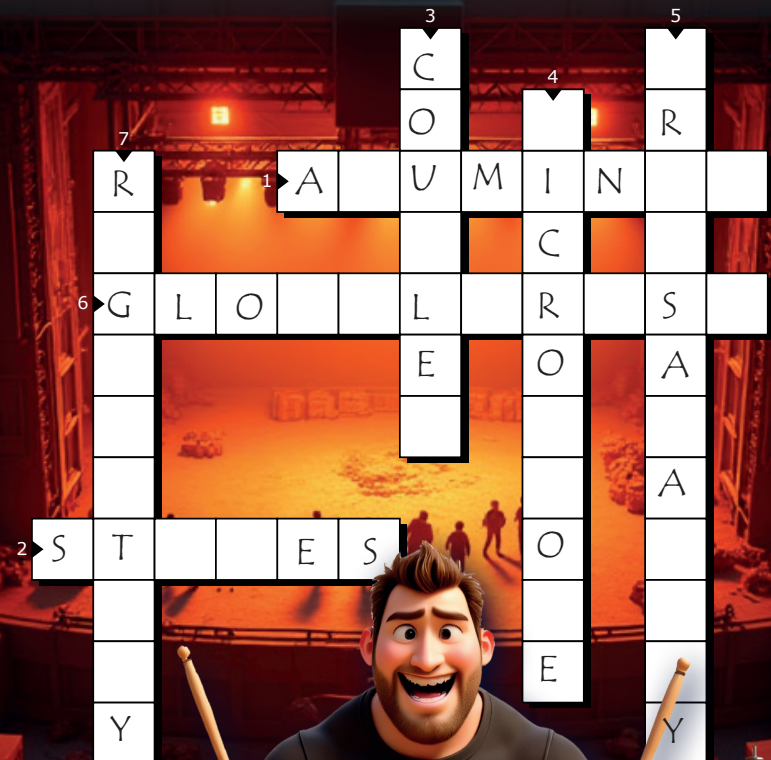

Oh no, there are cables everywhere! RiggerTony needs your help to keep things organized. Trace each cable with your finger from start to finish and find out which instrument is connected at the other end. Once you've found the correct connection, color that instrument in the matching cable color!

FIND THE 10 DIFFERENCES AND CIRCLE THEM

CRISS-CROSS

1. What are trusses made of ?
2. What is built using trusses ?
3. What do you call a device that helps attach lighting fixtures ?
4. What does RiggerTony bring onto the stage for the singer ?
5. Where does RiggerTony continue his training ?
6. Who makes the best trusses ?
7. What is the name of the event technician in this booklet ?

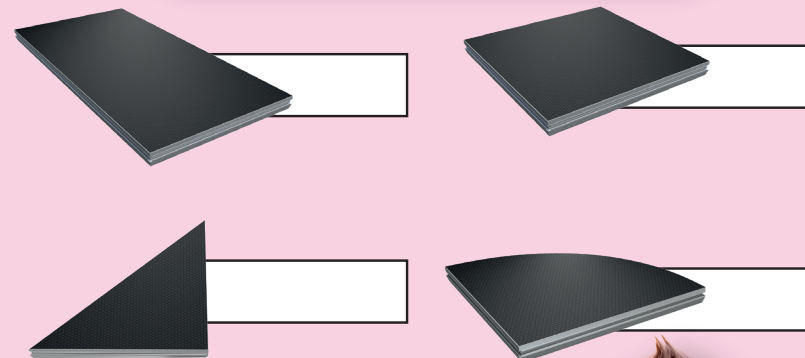

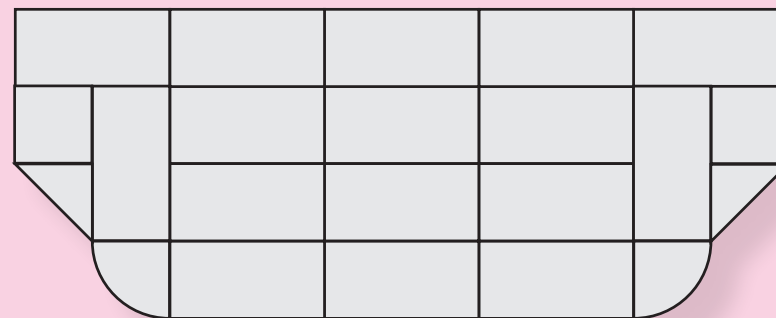

WHAT FITS HERE?

Each plug only fits one on the opposite side – but which belongs to which? Connect them and help RiggerTony.

STAGE PLATFORMS

There are different stage elements. How many elements does RiggerTony need to build this stage? Write the number of parts next to the respective stage pieces.

Trusses are our DNA! At **Global Truss**, we've been building high quality aluminum trusses and accessories since 2001, so that stages for concerts or shows stand securely.

Because we deliver our amazing equipment to over 50 countries, fantastic events can take place everywhere using them. Our trusses are made from the best aluminum and welded by true professionals, making them really strong and safe. We have everything thoroughly tested and are even TÜV-certified.

At our own Truss Academy, we show how to properly set up truss systems so that nothing goes wrong.

So, if you ever stand in front of a stage or attend a concert, you'll know how important our trusses are.
